Clarity & Concision

Clarity and concision are important in scientific writing. Because the ideas and concepts in scientific writing are so complex, they need to be presented to readers in a way that’s understandable and precise. This handout offers suggestions and strategies for reducing wordiness and improving clarity.

Always spend time editing:

Editing tips for clarity and concision
1: Dedicate one read-through solely to cutting. No additions allowed.
2: Use the Find/Search feature in Word/Adobe to hunt wordiness down
3: Search and/or circle:
   • redundancies and zeroes you know you’re prone to
   • any instance of expletives (it + be verbs or there + be verbs)
   • any preposition beginning a phrase
   • adverbs, especially “very” and “really”

Trim Bulky and Redundant Phrases:

Redundancies/Tautologies
Below are words commonly used together. The words in parenthesis are redundant. You can simplify your sentences by removing the tautology.

(already) existing introduced (a new) (empty) space start
(alternative) choices mix (together) (out)
at (the) present (time) never (before) had done (previously)
(basic) fundamentals none (at all) (still) persists
(completely) eliminate now (at this time) (end) result
(continue to) remain period (of time) (final) outcome
(currently) being (private) industry (currently) underway
(separate) entities (various) differences each (individual)

Expletives – it+is/was or there+is/are/was/were

Notice that several of the writing zeroes above start with “it is.” Keep an eye out for this and for sentence construction that begins, “there is.” Often, these constructions indicate a writing zero.

Eliminate:

Writing zeroes
Writing zeroes are words that do not add meaning or clarity to writing. Usually, writing zeroes can be eliminated without changing the surrounding sentence.

- For example: “In the course of our study, we discovered...” becomes “In the course of our study, We discovered...”
Below are some common writing zeroes that can be eliminated from your writing:

- The presence of
- It should be pointed out that
- It is noteworthy that
- It is interesting to note that
- I/we might add that
- As a matter of fact
- The fact that
- In the course of
- It is significant that

**Prepositional phrases**

Prepositional phrases are those that begin with prepositions like in, with, for, over, through, at, by. Often these phrases provide extraneous information and can be eliminated.

**Adjectives and adverbs**

Like prepositional phrases and writing zeroes, adjectives and adverbs often complicate sentences without adding meaning or clarity. Below are some common adjectives and adverbs that can usually be removed.

Adjectives: Comprehensive, detailed, fundamental, specific, particular, somewhat, kind of, sort of, type of...
Adverbs: Very, really, basically, definitely, actually, practically, generally...

**Nominalizations**

Nominalization occurs when words that are not nouns become used as nouns, often at the beginning of a subject or noun phrase. Often, this results in overly complex and convoluted sentences that would be clearer with a distinct action.

- For example: “The discovery of the researchers was that the frontal lobe showed increased activation.” *Discovery* is a nominalization of the verb *discover*. A more direct, active construction, without the nominalization reads, “Researchers discovered increased activation in the frontal lobe.”

Common nominalizations include

Establishment, measurement, development, collection, discovery, movement, reaction, completion, failure, refusal, discussion, investigation...

Simplify sentences and get to the point:
Verb phrases
Often writers use complex verb tenses that result in 2 or more verbs when a simple verb tense will do.
